SUMMARY

Full Stack Web Developer with a Bachelor of Arts degree in Environmental Business from the University of Redlands. A life-long passion for logic and problem-solving has led me to pursue web development. Efficient at developing mobile responsive designs and user friendly applications. Known among co-workers as focused and dedicated to tasks.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Applications: React, Redux, jQuery, Node, Express, ES6, MySQL, MongoDB, Git

PROJECTS

Super Hero Finder | github.com/chaselipscomb/SuperHeroeFinalProject | herofinder.herokuapp.com

- This project utilizes the SuperHeroAPI to retrieve data on all characters. I incorporated a React front-end and a MongoDB database hosted on Heroku. React hooks are implemented to create a simple yet powerful response.
- My work consisted of developing the design and entirety of the application. Ranging from the AJAX request in Express to the CSS on the web page.
- JavaScript, React, MongoDB, Express, Node, Bootstrap, Heroku

Joke Generator | github.com/chaselipscomb/Redux | chaselipscomb.github.io/Redux

- The Joke Generator uses the JokeAPI to retrieve data on 4 categories of jokes. The state is managed with Redux on a React Framework that is mobile friendly.
- For this application I introduced the basics of Redux to develop a simple website. On this solo project I created the entirety of the application.
- JavaScript, React, Redux, Node, Express

Employee Directory | github.com/chaselipscomb/reacthw | chaselipscomb.github.io/reacthw

- The Employee Directory utilizes the randomuser API to generate data. The front-end is built on React with responsive components that filter through profiles based on user input.
- This application I introduced the basics of the React framework to develop a responsive webpage. My core responsibilities for this app was to learn the foundation of React and class components.
- JavaScript, React, Node, HTML/CSS

Password Generator | github.com/chaselipscomb/Password | chaselipscomb.github.io/Password

- The Password Generator creates a unique password based on criteria obtained through prompts. Criteria includes upper/lower case letters, length, special characters and numbers. After the generation, the user may copy to clipboard if desired.
- My core function was to use plain JavaScript, HTML, and CSS to create a polished user interface and a simple but useful function which is generating a password.
- JavaScript, HTML/CSS

EXPERIENCE

Assistant 2018 – 2019

University of Redlands

Joshua Tree, CA

For this position I worked closely with environmental organizations to provide outdoor camping trips to educational programs. My key responsibilities included communication with programs to obtain information, reaching out to Joshua Tree staff, and meeting deadlines to provide government documents. As part of a team, I developed professional communications skills and responsibilities that are essential to a work environment.

Tennis Coach 2015 – Present

Irvine, CA

My lifelong background in tennis has given me the opportunity to work with local tennis players on developing their tennis foundation. As an instructor I have worked with varying age groups that bring different wants and needs. These needs have given me the ability to learn to be adaptable as well as provide the services that are asked of me. Whether these needs are for private lessons or as a hitting partner, providing the best value in the least amount of time is my number one priority and translates to my career as a web developer.

EDUCATION

Bootcamp Certificate: University of California, Irvine

A 12-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelor of Arts - BA, Environmental Business

University of Redlands, CA 2015-2019
